eeWings

Titanium Cranks

Virtually indestructible and stunning on nearly any type of bike. From gravel race machine, to heavy-hitting bike park rig, to the undetermined bike you'll build 10 years from now. They're as light as carbon cranks but offer significantly more durability and impact resistance – not to mention industry leading power transfer. **Now with 8-bolt chainring and power meter compatibility, plus an ultra-friendly 8mm fixing bolt.**

When others separate, bend, break, or simply fade – eeWings are Ageless.

SPECIFICATIONS:

WEIGHT:	398g (AR, 165mm)
MATERIALS:	Butted 3/2.5 titanium arms with CNC 6/4 titanium spindle and Hirth joint
HARDWARE:	Stainless steel 8mm crank fixing bolt and chainring bolts
