

FINISH LINE®

# BOOSTED™

— ECO WITHOUT COMPROMISE™ —

Finish Line® BOOSTED™ is set to advance the bike care category by sparing cyclists and mechanics the difficult choice between performance and sustainability.

BOOSTED™ delivers low-friction lubrication and powerful cleaning formulations made from eco-friendly plant and water-based ingredients. Welcome to eco without compromise!

DYES

Ground-breaking water-based cleaner and degreaser technology that delivers solvent-level degreasing power for chains and gears. This concentrated formula can also be diluted with up to 10 parts water for fast and safe cleaning of all other parts of the bike.

- ✓ Breaks down grease, oil, dirt & grime with ease
- ✓ Concentrated formula degreases like a solvent
- ✓ All-purpose, safe for use on all bike parts
- ✓ Fast-acting, works with or without water rinsing

Advanced plant-based wax-film lubricant that goes on wet and dries to leave a durable, low-friction, coating. BioWax™ keeps chains clean, quiet, and extremely efficient over long distances.

- ✔ Sets up clean & dry to repel dirt & grime in all conditions
- ✔ Keeps chain clean to prevent abrasive wear
- ✔ All-weather protection & suitable for all riding disciplines

Advanced wet-film chain lubricant formulated with oils synthesized from plant-based materials. BioWet™ delivers ultra-low friction, exceptional high-mileage durability, and maximum water and corrosion resistance.

- ✔ Low-friction wet-film repels water & prevents corrosion
- ✔ Delivers high-mileage riding in all conditions
- ✔ Improves pedaling efficiency & reduces chain noise

Clear and non-toxic bike grease made from synthesized plant-based oils. Purposely formulated for suspension systems, ceramic and high RPM bearings. BioGrease™ delivers ultra-low friction, exceptional water-repellency, corrosion protection, and positive lubrication in extreme temperatures, -20°F to 250°F. Safe and compatible with all suspension gaskets and O-rings.

- ✔ Clean, non-staining & water repelling
- ✔ Extreme temperature resistance (-20°F to 250°F.)
- ✔ NLGI 1 Grade for ceramic bearings & suspension rebuilds
